which is also derived from the pursuit of human life **quality**.

Charm pursues **excellence** and loves a **happy** life.

advantage

hi-tech

All our scent machines adopt the cold air diffusion/ TWIN FLUID atomization technology that is the inner powerful air pump could releases the presure to break down the essential oils into the nano size particle so that the air scent is cold and dry to make the air scent could cover big area and also there is no heat to well protect the benefit of the oils. This is the main different from the traditional scent burner or aroma diffuser.

handy control

With the wifi connected function,you could use your smart phone to control the scent machine:

- A.The machine on and off.
- B. Adjust the working time, stop time and working day of the machine.
- C. Adjust the intensity of the fragrance.
- D. Record the application location of each machine.
- E. Automatic calculation of aromatic oil.
- F. Reset aromatic oil.
- G. Reset machine name.
- H. Authorizing the machine to others within a specified period.
- I. Control multiple machines on one smartphone.
- J. Automatically adjust to the same local time as your country.
- K. Automatic transmission of equipment failure notification.
- L. Seperate scent machines into different group to unified management.

application

commercial cleaning

There are many cleaning service for the commercial places. To some high levels clients such as rich families, world-class office buildings, international level hotels, the commercial cleaning company could use our scent machine so that to upgrade your service and make your clients' places full of good smelling.

home

Our scent machines adopt the cold air diffusion that is using the cold air and the cold air pressure to make the dry and fine scent mist. This is the best way to keep the benefit of the aroma and essential oils due to no heating to destroy the oils.

scent marketing

All the brands need to do marketing and scent marketing become the natural, easy way for brand marketing or brand strategy. How to do the scent marketing? First, it is based on your brand to select the most suitable signature scent flavor. Secondly, we could check your own business places included your shops, your offices, your hotels to know the coverage of these places, and check whether there has the FCU system or HVAC system, so that we could choose the most suitable scent machine to match your business places. If you need help, you could directly contact us, we could give you the professional suggestions.
