Condition	Solution
Fail to Connect	<ul style="list-style-type: none"> <li>-- Sure device is <b>power on</b></li> <li>-- Sure <b>WiFi icon</b> is <b>flashing</b> in LCD before the connection</li> <li>-- Sure <b>WiFi is not 5Ghz</b></li> <li>-- Sure WiFi password is <b>100% correct</b></li> <li>-- Sure <b>mobile, device, router</b> are <b>close to each other</b></li> <li>-- Sure <b>signal</b> of the router and mobile goes <b>smoothly</b></li> <li>-- Sure the WiFi name is <b>without any Chinese</b></li> <li>-- If the device connected to the router reaches the upper limit, please <b>turn off</b> the WIFI function of a device, and empty the channel to reconfigure this new scent device.</li> <li>-- If the router enables wireless MAC address filtering, you can try to remove the device from the router's MAC filtering list to ensure that the router does not prohibit the machine from connecting to the Internet.</li> <li>-- If the WiFi password is shared and the password needs to be verified, it will fail to connect</li> </ul>
Device Keeps Offline	<ul style="list-style-type: none"> <li>-- Sure device is <b>power on</b></li> <li>-- Sure <b>WiFi signal</b> is <b>good or not</b></li> <li>-- Whether the Wi-Fi name, password. have been <b>modified</b>, if yes, please delete the device in the APP and re-add it to the APP</li> <li>-- Please try to <b>restart the router</b> and wait for 3 minutes to observe the device status</li> </ul>

If none of the above solutions can solve the problem, please contact us directly, please provide a video, which must be included the below information details, so that we can quickly give you a solution, thank you for your cooperation.

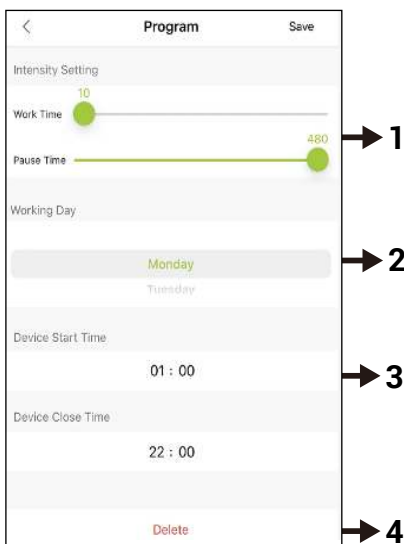

A, the problems encountered and the process,  
 B, LCD screen to show how is the WIFI icon  
 C, the WIFI number behind the device

## How to program

- 1 Display Device Name "Home"
- 2 Device Settings
- 3 Display the Remaining % of Scented Oil and Intensity

- 4 Display On / Off
- 5 Program Setting
- 6 On / Off Switch

### 1 Scent Intensity Setting

- The work time and the pause time could be adjusted from 10s to 480s;
- The longer work time, the stronger smelling.
- The longer pause time, the lighter smelling.

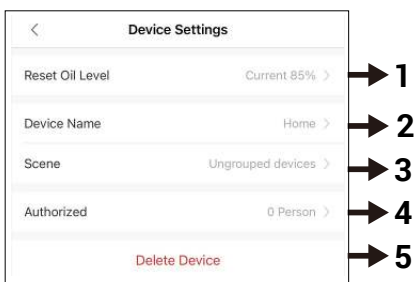

### 2 Working Day Setting

- Total 15 options of the working days, you could choose one.
- If none of the options meet your requirements, you can set up more events.
- For example: if you want the working day is on Monday , Friday and Sunday; you can set Moday as the working day in event 1, Friday in event 2 and the Sunday in event 3.

### 3 Working Time Setting

- Sure the start time must be earlier than the close time;
- The close time cannot exceed 23:59; if you want to exceed 23:59, you can set two events; for event 1, set the close time to 23:59; for event 2, set the start time to 0:01

### 4 Delet the Setting Event

#### 1 Remain Oi Level

- After refill the full bottle oil, could reset it

#### 2 Change Device Name

#### 3 When there are too many devices, you can manage the devices in different groups, which is more efficient

#### 4 Another person can be authorized to control the device, but this person must be registered with MuTech

#### 5 Delete this Device

## Group Function

### Search group:

You can fill in the group name in the search bar to quickly find the corresponding group

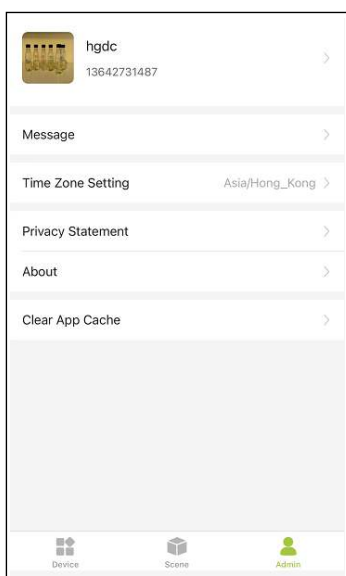

### Add a group:

Click the + in the upper right corner to add a new group

### In the same group

can control the switch of the whole group, edit the group name, add or remove the device, authorize others to control the whole group, delete the group

## Admin Function

### Personal Center:

Can change personal avatar, change personal name, change password, log out

### Message Center

Can view the messages about the improper operation of the device, the status of the device, etc.

If you do not want to receive such messages, you can go to the phone settings--MuTech--message settings--turn off receiving messages

### Time Zone Setting

The time zone can be set manually
